- This is the room temperature structure. Below 45K $GaMo_4S_8$ transforms into a rhombohedral structure.
- (Ben Yaich, 1984) do not give the lattice constant for $GaMo_4S_8$. We infer it from their interatomic distances and obtain a value of a = 9.7294Å. The ICSD entry uses a = 9.74Å.

Face-centered Cubic primitive vectors
